

EnPacs are the Marine Power line of **stern-drive** engine packages. These engines have a long list of standard features as well as a wide range of options. Whether you're upgrading horsepower, replacing a worn out power plant or looking for the benefits of today's cutting edge technologies like **Electronic Fuel Injection**, there's a Marine Power **EnPac** option to fit any I/O afloat. Marine Power **EnPac's** are compatible with most OMC, Mercruiser or Volvo type stern-drive applications.

Marine Power **EnPacs**... *Commercial Engines for the Serious Boater!*

STOP! Before you buy, look for value. Shop and compare the differences between a base engine, a rebuilt engine and a brand new Marine Power **EnPac**.

New "QUANTUM" EnPacs

Marine Power has developed the "Quantum" series engines that were designed to replace more specific OEM sterndrive packages. They are equipped with additional standard features that provide for an easier installation. There are three models to choose from: **MR1** - designed to replace Mercruiser engine models built 1985 and before. **MR2** - designed to replace Mercruiser engine models built 1986 and after. Alpha and Magnum Series; **VR1** - designed to replace Volvo engine models.

In addition to the standard **EnPac** features, the "Quantum" series have the following special equipment:

MR1

MR2

VR1

- 14" Flywheel

- 12-3/4" Flywheel
 - Marine Power C-R Manifolds
 - Flexplate Coupler
 - Throttle Linkage Bracket
 - 90 degree Exhaust Elbows
 - Dual Alternator Belts
- alpha-style C-R Manifolds
 - 3" Risers
 - Flexplate Coupler
 - Throttle Linkage Bracket
 - Dual Alternator Belts
- 12-3/4" Flywheel
 - Volvo-style Manifolds
 - Damper Plates
 - Seawater Pump
 - Dual Alternator Belts
 - 3' Harness Extension (Volvo Compatible)

We're sure that you'll find that **value** is what Marine Power's **EnPacs** are about.
