Size comparison information for model Barracuda MD170 & MD200

Some additional facts of interest regarding the MD170 & MD200

- The Barracuda is a V-8 with 6.5L displacement. All others listed in this comparison are 5.7L. and smaller. Smaller displacement means the engine works harder and at higher rpm to make the same power
- The Barracuda burns on average about half the amount of fuel.
- The MD170 is a drop in replacement for most all marine gas engines, including the ability to use the same instruments and wiring.
- The MD170 is based on the rugged Optimizer 6500. This engine is standard equipment with Hummer diesel powered trucks.
