

Marine Power was the first marine engine manufacturer to introduce **Electronic Fuel Injection (EFI)** in the **SportPac** engine line. **SportPacs** come with a long list of standard features and backed with an impressive Limited **2 year warranty**. From the instant you turn the key, you'll be amazed by the benefits of Marine Power **SportPacs**.

Marine Power offers CHOICES at a price you can afford!

SportPac Models. These models add Marine Power's expertise and reputation to General Motor's VORTEC block, to give value-conscious boat owners an economical, quality engine. First time owners will appreciate the affordability, low operating costs, and long list of features more boaters ask for.

SportPac Engines	CID	CYLINDERS	CARBURETED	EFI-TBI	EFI-PFI
3.0 LITER	181	L4	X	X	
4.3 LITER	262	V6	X	X	
5.7 LITER	350	V8	X	X	X
7.4 LITER	454	V8	X	X	X
8.1 LITER	496	V8			X
8.2 LITER	502	V8	X		X

Dual Remote Oil Filters

Marine Power's trademark originating from our commercial days. Increased oil capacity and filtration while maintaining a lower pressure drop across the filter circuit. Mounted vertically for easier maintenance.

Dual Alternator Drive Belt

Another Marine Power trademark from the commercial engines. Dual belts gave the fisherman comfort while pushing those "wing nets" all night long with big spotlights. The dual belt drive provides an extra measure of security on the high seas.

Crankshaft Driven Seawater Pump

This high capacity seawater pump has no belt to break. The accessibility is a major benefit to inboard owners. The impeller can be changed with ease.

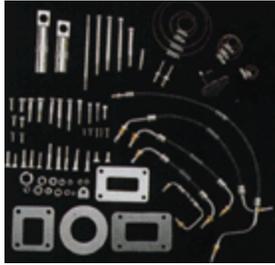

Lightweight Alloys

Marine Power uses the more expensive lightweight alloys wherever possible. Every boat owner knows less weight means less fuel use with more speed.

State of the Art Fresh Water cooling System

Marine Power's most popular option engineered as a compliment to the engine rather than an add-on.

Stainless Steel

The Marine Power SportPac engine is designed with salt water applications in mind. Marine Power uses only stainless steel trunion mount pins for easier adjustment. Additionally, stainless steel fasteners are used in service locations where appropriate for easier maintenance after years of service.

Standard Equipment

- DELCO Electronic Ignition
- Heavy Duty 55 Amp Alternator
- Engine Mounts
- Plastisol Oil Pan
- Superior quality corrosion resistant urethane paint
- High capacity seawater pump package
- Weather Cover
- High Torque Starter - Top Mounted - Relay Assisted
- Engine Oil Cooler
- Dual Remote Oil System
- Center Rise Manifolds
- Holley or Quadrajet Carburetor
- Dual Alternator Belts
- Flame Arrestor
- 50 Amp Circuit Breaker
- Engine Wiring Harness
- Fuel / Water separator
- Bi-directional Dipstick & Tube w/oil drain fitting (V-8)
- Drain Fitting
- Brass Fittings

Note: 181 does not include top mount starter, dual alternator belts, fuel separator, seawater pump, remote oil system or oil cooler.

Optional Equipment

- Electronic Fuel Injection
(Throttle Body or Multi Port Fuel Injection)
- Fresh Water Cooling
- Hurth or Borg Warner transmission
- 3" or 6" Exhaust Spacers
- Alarm System
- 4" Exhaust Risers
- Instrument Panel
- Performance Manifolds
- High Capacity Cast Aluminum Oil Pan

*Note: Not all options are available on all engine models. Contact your nearest Marine Power dealer for specific engine model options. Marine Power reserves the right to make continuous product improvements without notice or liability. OEM models may differ slightly.
