Confidence

When it comes to buyer protection, no other plan in the industry can compare to Crusader Captain's Choice. All Captain's Choice engines feature a one-year warranty, with an additional two years of factory-backed buyer protection. This three-year plan is unsurpassed, and it is a tribute to the confidence we have in our products.

Warranty work and services can be found at over 900 locations cross-country and we are proud of our record of immediate parts delivery and impeccable customer service.

Factory-trained technicians are educated at the Crusader College, a series of week-long service schools, held at Crusader's dedicated training facility in Columbia, South Carolina. After successfully completing a College session, which are specific to each division, technicians are thoroughly trained to troubleshoot, diagnose, repair and service Crusader products.
